EXECUTION

In compliance with this Invitation for Bids (IFB), and subject to all the conditions herein, the undersigned Vendor offers and agrees to furnish and deliver any or all items upon which prices are bid, at the prices set opposite each item within the time specified herein.

By executing this bid, the undersigned Vendor understands that false certification is a Class I felony and certifies that:

- this bid is submitted competitively and without collusion (G.S. 143-54),
- that none of its officers, directors, or owners of an unincorporated business entity has been convicted of any violations of Chapter 75A of the General Statutes, the Securities Act of 1933, or the Securities Exchange Act of 1934 (G.S. 143-59.2), and
- it is not an Ineligible Vendor as set forth in G.S. 143-59.1.

Furthermore, by executing this bid, the undersigned certifies to the best of Vendor's knowledge and belief, that

- it and its principals are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from covered transactions by any Federal or State department or agency.

As required by G.S. 143-48.5, the undersigned Vendor certifies that it, and each of its sub-Contractors for any Contract awarded as a result of this IFB, complies with the requirements of Article 2 of Chapter 64 of the NC General Statutes, including the requirement for each employer with more than 25 employees in North Carolina to verify the work authorization of its employees through the federal E-Verify system.

G.S. 133-32 and Executive Order 24 (2009) prohibit the offer to, or acceptance by, any State Employee associated with the preparing plans, specifications, estimates for public Contract; or awarding or administering public Contracts, or inspecting or supervising delivery of the public Contract of any gift from anyone with a Contract with the State, or from any person seeking to do business with the State. By execution of this bid response to the IFB, the undersigned certifies, for Vendor's entire organization and its employees or agents, that Vendor are not aware that any such gift has been offered, accepted, or promised by any employees or agents of Vendor's organization.

By executing this bid, Vendor certifies that it has read and agreed to the **INSTRUCTION TO VENDORS** and the **NORTH CAROLINA GENERAL TERMS AND CONDITIONS**. These documents can be accessed from the ATTACHMENTS page within this document.

Failure to execute/sign bid prior to submittal may render bid invalid and it MAY BE REJECTED. Late bids cannot be accepted.

TOTAL PERCUSSION

Yamaha Total Percussion Series instruments offer the quality and durability educators depend on at schools across the country. The comfortable backpacks and adjustable rolling carts make it easy for students to transport their instruments. Educators will appreciate the sturdy stands that allow quick instrument changes and a simple keyboard layout. Yamaha Total Percussion kits give beginning students an instrument that is easy to play and has a quality of sound consistent with the larger instruments. This product allows dealers and educators to create the kit they need and only invest in the necessary components. It is designed to be flexible for dealers, educators and students. Given the weight of many student percussion kits on the market, the Yamaha kits allow students to carry only what they need for rehearsal and/or performance. Purchase the full combination kit for the entire selection or add pieces and "go as you grow."

PROFESSIONAL SERIES CONCERT FLOOR BASS

The Concert Floor Bass ("Impact Drums") can be seen either as a low extension for concert toms or a responsive high extension for concert bass drums. The FB-9000 series gives users a wider choice of instrumentation for a variety of musical needs with 6-ply birch shells and 10-ply birch hoops, constructed using the Yamaha Air-Seal System™. They deliver rich, low-frequency harmonics as well as outstanding definition and clarity; 16" deep shells for extra sonic depth and projection and a darkwood stain finish that complements the look of any ensemble. Stable legs, developed for the floor toms used with Yamaha drum sets, have been customized to allow ample height-adjustment range for standing performance. The REMO Powerstroke 3 Coated (batter head) and REMO Clear Ambassador (resonant head) contribute to a rich, musical tone.

9400 SERIES MARCHING SNARE DRUMS

Yamaha 9400 series SFZ Marching Snare Drums feature improved hardware with a durable, lightweight design that enhances player movement and reduces fatigue without compromising tone. The Exclusive Air-Seal system ensures a solid, consistent round 6-ply maple shell allowing the augmented shell depth to provide a warm tone with excellent presence and projection that blends with any ensemble. Additional air holes produce precise snare articulation without reducing volume. Ships with REMO White Max batter drumhead (without dot). The MS-9414 marching drums have been designed to satisfy director and player requirements through extensive field testing and evaluations with top DCI and WGI performing groups and artists. The SFZ legacy continues.

Available in a (W) white wrap finish and in three stain finishes: (B) black forest, (BU) blue forest and (R) red forest.

8300 SERIES FIELD-CORPS MARCHING TOMS

Yamaha Field-Corps multi-toms deliver a pure, focused tone that is maximized by a deeper, balanced set of toms. These toms are equipped with a lug that utilizes an arch-shape design that allows the shell to vibrate freely, thus delivering greater tone. The Field-Corps multi-toms are also equipped with a 2.3 mm thick, steel UltraHoop™ rim that is specially designed by Yamaha. Its profile protects the bearing edge from mallet sweeps, which is especially important as the rim height lowers and the drumhead stretches. The multi-toms also utilize a high-strength aluminum reinforcement ring inserted just below the bearing edge to maintain shell integrity when high-tension tuning is used.

The 8300 Series Field-Corps Marching Toms feature Yamaha exclusive Air-Seal System shell construction and deep-cut, 6-ply maple shells for enhanced mid-range tone; 5.4 mm tension rods for reliable tuning without extra weight; an aluminum reinforcement ring just below the bearing edge to maintain shell integrity; and a REMO Clear Pinstripe drumhead.

Available in a (W) white wrap finish and in three stain finishes: (B) black forest, (BU) blue forest and (R) red forest. Soft cases for drums and Stadium Hardware are available on page 30. Orders that include a PCH-MQLD case must ship by truckline.

Features include 6" and 8" drums that are 7-ply, and 10"-14" drums that are 6-ply maple shells; an X-deep cut allows increased tone and resonance; time-tested, 45-degree bearing edge provides articulate projection second to none; black stain inner-shell finish for all forest colors provides a complete and finished look.

Contour Hinge**8300 SERIES FIELD-CORPS MARCHING BASS DRUMS**

The 8300 Series Field-Corps Marching Bass Drums feature Yamaha exclusive Air-Seal System shell and hoop construction and a 7-ply maple shell that provides deep, resonant tones with solid, punchy attack. The 8300 Series also features a lightweight aluminum arch-shape lug casing that allows the shell to vibrate more freely.

Ten-ply maple hoops have a rounded outside edge for pinpoint tension in conjunction with a revamped claw. A wide-body claw offers greater tuning stability and reduces hoop damage with high-tension tuning. All drums also include 5.4 mm tension rods for reliable tuning without extra weight and REMO Smooth White Ambassador bass drumheads. All drums come internally pre-muffled with Yamaha Sound Impact Strips™.

Available in a (W) white wrap finish and in three stain finishes: (B) black forest, (BU) blue forest and (R) red forest. See page 30 for soft cases for drums and Stadium Hardware.

Orders that include a PCH-MB26 case, PCH-MB28 case, PCH-MB30(S) case, PCH-MB32(S) case, MB-8226 bass drum, MB-8228 bass drum, MB-8230 bass drum and MB-8232 bass drum, or three or more of any size bass drums, must ship by truckline.

ABS™ MONOPOSTO/BIPOSTO TUBULAR VEST HINGE CARRIERS BY MAY

May Monoposto and Biposto carriers incorporate J-Rod-free technology that gives drummers complete freedom of movement. This technology, in combination with Contour Hinge Tube Carriers, creates an ergonomic, lightweight design, and the Articulating Back Support (ABS) promotes spinal alignment. This patented design is the optimal carrier for comfort and is adjustable to fit the smallest to the largest students. Features include a polycarbonate belly plate; infinite torso height adjustment; tow-in adjustment (angle front to back of tubes near the shoulders); shoulder rotation that allows adjustments to the camber (left and right) and caster (back to front); adjustable back bar that facilitates easy shoulder adjustment with back bar support.

KEIKO ABE SIGNATURE SERIES MALLETS

The Keiko Abe Signature Series features 10 different degrees of soft to hard mallets that make it easy for an artist to select a voiced set of four for any musical situation. The hard mallets are heavy and create a full sound from the upper range of the marimba, while the bass mallets pull the fundamental resonance out of the instrument's lower range. These yarn-wound mallets are ideal for solo work as well as concertos; they boast thick, rattan Yamaha shafts in a variety of lengths. Each mallet has a unique characteristic and texture and includes color-coded tape for easy identification during play.

We Take Full Responsibility

— For Protecting the Environment —

Like you, Yamaha employees around the world want to live in an environment with clean air and water. So we created a wide range of initiatives that embrace our corporate responsibility and address vital issues, like global warming and biodiversity. For instance, we recycle and reuse factory waste water, plant trees in growing forests, build instruments from eco-friendly materials, cut emissions of greenhouse gases from manufacturing and shipping, and employ ISO 14001 environmental management systems worldwide. We thought you'd like to know because we don't just work together, we all live together.

Planting new trees is one of many Yamaha eco initiatives.

400 SERIES PLANT-BASED PLASTIC RECORDERS

400 Series recorders are made from ECODEAR®, a plastic material created using plant-based resins. Based on the popular 300 Series body design, the denser nature of ECODEAR plastic gives these recorders a rich tone and free-blowing response that's similar to a wooden instrument. Includes zippered cotton carrying bag, fingering chart, owner's manual, cleaning rod and recorder cream.

We Take Full Responsibility

— For Protecting the Environment —

Like you, Yamaha employees around the world want to live in an environment with clean air and water. So we created a wide range of initiatives that embrace our corporate responsibility and address vital issues, like global warming and biodiversity. For instance, we recycle and reuse factory waste water, plant trees in growing forests, build instruments from eco-friendly materials, cut emissions of greenhouse gases from manufacturing and shipping, and employ ISO 14001 environmental management systems worldwide. We thought you'd like to know because we don't just work together, we all live together.

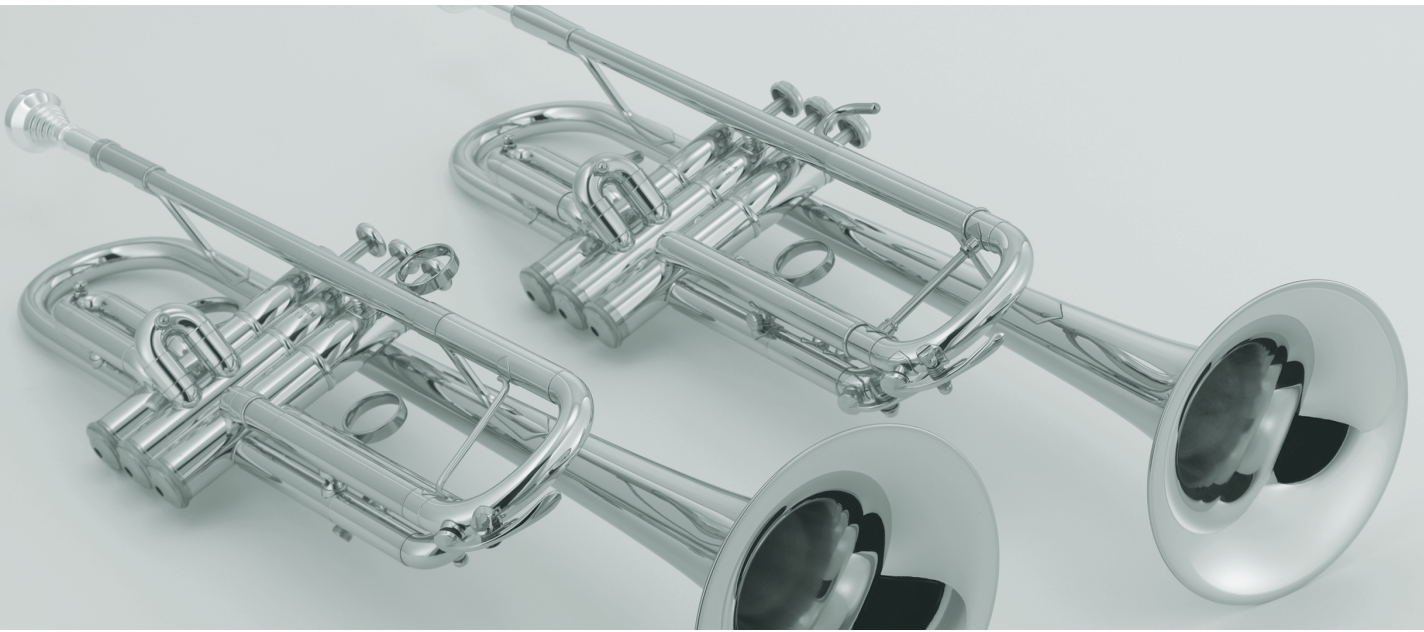

Planting new trees is one of many Yamaha eco initiatives.

FLUTES

STANDARD FLUTES

Yamaha Standard Flutes have become a favorite among teachers because of their open sound and easy playability. The headjoint, body and footjoint are made of durable nickel-silver. Neoprene bumpers increase durability and achieve a maximum fit against the body. Recent improvements include a stronger post design to prevent bending of the posts, easily accessible adjustment screws, an improved adjustment screw material and body markings for proper positioning of the footjoint.

CLARINETS

STANDARD CLARINET

The Yamaha Standard Clarinet features a responsive, rich tone as well as excellent durability. The quality construction will stand up to the rigors of student use in both concert and marching situations. The student model features a bell and barrel design integrated from the more expensive V-Series models. Intonation is improved by undercut tone holes, and an innovative design helps prevent jamming or breaking of the bridge keys. Rustproof, stainless steel springs offer a quick response for accurate playing.

YCL-255	STANDARD Clarinet; key of B \flat ; matte finish ABS resin body, barrel and bell; nickel-plated keys; adjustable thumb rest with neck strap hook; CLC-180 case; 4C mouthpiece	\$1,140.00
---------	--	------------

INTERMEDIATE CLARINETS

Yamaha Intermediate Clarinets feature a grenadilla body, barrel and bell. These models feature a bell and barrel vertically integrated from the popular Yamaha V-Series models. Undercut tone holes provide accurate intonation and responsive playing. Durable features include power-forged keys and blue-steel springs that will stand up to years of use, and an innovative design helps prevent jamming or breaking of the bridge keys. All Yamaha intermediate clarinets now feature an adjustable thumb rest with neck strap ring.

---------	---	----------

CUSTOM V-SERIES CLARINETS — DEMAND A HIGHER STANDARD

The Yamaha V-Series Clarinets offer comfortable, ergonomic hand placement and new keys that have thicker silver-plating for a dark and resonant sound quality. Durable leather pads ensure a precise seal between pad and tone hole for ease of response throughout the entire range of the clarinet. Two different bore taper options pair to offer players with choices to find the optimal combination of response and tone for their own playing style. A new custom barrel design provides a well-balanced response and rich, warm tonal colors that will elevate the progressing clarinetist's playing.

YCL-CSVR	CUSTOM Clarinet; key of B \flat ; grenadilla wood body, barrel and bell; Custom CSVR bore design; silver-plated keys; adjustable thumb rest and neck strap ring; CLC-65 case and CLB-90II cover; 4CM hard rubber mouthpiece	4,917.00

TRUMPETS

The Yamaha trumpet lineup demonstrates the company's commitment to vertical integration, the top-down design approach that allows players to have a smoother transition from student, to step-up, to Artist Model trumpets as they progress through their musical journey. Yamaha Standard trumpets feature a laser-fused, plazuma-welded bell for continuous, even vibrations in all registers. Honed valves ensure a precise, airtight fit between valve casings and pistons. The gold-brass leadpipe and monel alloy pistons are corrosion resistant. Yamaha Intermediate models feature the same durable materials as the Standard models, but also have hand-lapped valves and slides for precise action, a technique used all the way up to Artist Model trumpets. Yamaha Professional standard weight trumpets feature a one-piece bell and a one-piece drawn gold-brass leadpipe for exceptional tone and response. Yamaha Custom, Xeno and Artist Model trumpets feature fine-tuned specifications designed to meet the needs of professional and aspiring professional players.

CORNETS

Yamaha Standard Cornets feature laser-fused, pluzuma-welded bells for continuous, even vibrations in all registers. Honed valves ensure a precise, airtight fit between valve casings and pistons. Delrin one-piece valve guides provide long-lasting, quieter valve action. Yamaha Professional Cornets feature hand-lapped valves for smooth flow of air and a one-piece drawn gold-brass leadpipe offers excellent intonation, response and ideal resistance. By utilizing a trumpet mouthpiece receiver and elements from the Xeno Artist Model Chicago Trumpets, the Custom Cornet is designed to meet the unique demands of orchestral trumpet players in an orchestral environment.

FLUGELHORNS

Yamaha Professional Flugelhorns have the classic design of vertical valve tubing. Hand-lapped valves and slides provide a precise fit and smooth flow of air through the instrument. The movable mouthpiece receiver ensures easy tuning. The monel alloy pistons are corrosion-resistant and long lasting. In addition to the Professional features, Yamaha Custom Flugelhorns include an ergonomically shaped 3rd valve slide trigger, designed to accommodate a wider range of hand sizes. The newly designed leadpipes provide excellent response and intonation throughout the entire range of the instrument.

TROMBONES

Yamaha Standard Trombones have laser-fused, plazuma-welded bells for continuous, even bell vibrations. The inner slide is drawn from chrome-plated, nickel-silver for better durability and response. The outer slide is one-piece drawn brass for accurate diameter and better resonance while the unique slide lock design safely locks the slide in place. Yamaha 400 Series Trombones feature high-quality gold-brass bell material and a seamless bell construction. Yamaha Professional and Custom Trombones feature chrome-plated, nickel-silver inner slides for durability and response. The 600 Series features a two-piece bell for maximum tone, projection and dark tonal color. F-attachment trombones feature large, hand-lapped rotary valves for a free-blowing and quick response. Yamaha Custom Z and Xeno trombones were developed with input from the world's most foremost trombone artists and offer a rich, projecting sound with a solid core and a wide spectrum of tonal colors.

HORNS

Yamaha Standard and Intermediate Horns feature a wrap that provides more comfortable hand positioning and smooth airflow. Enhanced response and intonation is provided by the taper design on the gold-brass leadpipe. The nickel-silver inner and outer slides provide a superior fit with less chance of corrosion. The tapered valve design ensures long wear and protects against leakage. The durable clear epoxy lacquer finish provides long-lasting beauty. In addition, Yamaha Intermediate Horns feature an adjustable 4th rotor thumb lever that accommodates any size hand and a well-placed water key provides efficient water drainage. Yamaha Professional and Custom Horns feature hand-lapped rotary valves and slides for an airtight, smooth action. Quick, responsive motion is provided by the articulated key levers. The hammered and annealed bell responds consistently in all ranges and the cyclical bore design produces consistent airflow throughout the horn. In addition, Yamaha Custom horns carry highly-refined elements of handcraftsmanship and promise responsive, light action.

LOW BRASS

ALTO HORNS

Yamaha Alto Horns have a sound that is full and round for a warm blend with other brass instruments. The laser-fused, pluzuma-welded bell provides continuous and even bell vibrations in all registers. Pressure-formed tubing ensures reduced resistance and easy blowing. The gold-brass leadpipe is corrosion resistant.

EUPHONIUMS

Yamaha Standard and Intermediate Euphoniums feature pressure-formed tubing for a smoother air flow, a laser-fused, pluzuma-welded bell for even vibrations and honed valves for precise fitting of the piston. Yamaha Professional and Custom Euphoniums offer a hand-hammered, yellow-brass bell that features an advanced taper design for maximum projection and dark tonal color. The non-corrosive, gold-brass leadpipe also has a taper design that allows greater control and response. All slide tubing is nickel-silver for improved tone and corrosion resistance.

HARMONY DIRECTOR

The HD-300 Harmony Director is a revolutionary device for teaching intonation by comparative learning. Unlike traditional tuners that correct one pitch at a time, the HD-300 teaches students to tune the notes within actual chords, helping improve intonation, harmony and overall sound. It features new educational tools and a simplified user interface. The addition of an iOS mobile app that can act as a stand-alone tuner as well as a hardware controller makes the teacher's job easier and helps students play "IN TUNE, IN TONE, IN TIME, and at the CORRECT VOLUME."

SILENT/ELECTRIC STRINGS

SILENT VIOLINS

Designed strictly for Silent Practice, the YSV104 employs the Yamaha SRT Powered system that has been a highly acclaimed success in Silent Guitar models. Left and right channel volume, frequency response, and delay have been carefully optimized so that the performer can play while hearing realistic acoustic tone and resonance via the headphones.
